

LSS Community Transition Center

Helping Individuals Rebuild and Transition

At LSS, we are committed to helping individuals rebuild their lives through compassionate, trauma-informed care. The Community Transition Center (CTC) provides a comprehensive approach to supporting individuals involved in the justice system. With personalized case management, evidence-based programming, and strong community connections, we empower clients to overcome challenges, meet court requirements, and achieve long-term stability. You can trust LSS to provide the care and guidance needed for successful transitions.

Services offered:

- Individual Case Management
- Person-Centered Goal Planning
- SUD Assessments Service/Treatment Coordination
- Psycho-Educational
- Groups Random Drug Testing

Specialized Support Programs:

Supporting Pretrial Monitoring

CTC partners with Eau Claire County to provide pretrial monitoring for individuals with open cases. Participants are required to maintain regular contact through weekly or biweekly check-ins. Services include supervised random drug testing, support from our Care Coordinator, and access to voluntary programs aimed at compliance with court orders and connecting with vital community resources.

Collaborative Case Management for Probation Services

CTC offers comprehensive case management for medium- to high-risk individuals on probation. Our services include SUD assessments, individual case management, drug testing, psychoeducational groups, and connection to community resources. We work closely with LSS and community providers to ensure treatment meets each client's unique needs, helping them develop prosocial skills and build a path toward lasting recovery.

Specialized support programs continue on the reverse side.

COMPAS Assessments

For attorneys with clients in Eau Claire County, CTC provides COMPAS assessments to evaluate client needs. These assessments help determine the most appropriate diversion programs, ensuring that clients receive the right level of care and support.

DAGP STAR Program

For individuals with multiple drug-related cases, the DAGP STAR program offers 12–18 months of structured support, including treatment assessments, step-down services, case management, and peer support. This program is designed to guide individuals toward recovery and reduce recidivism.

OWI Early Intervention Program

The OWI Early Intervention Program provides alternatives for individuals with nonfelony OWI charges. Successful completion of this 120-day program, which includes random drug testing and SUD treatment, can reduce jail time, offering participants a chance to regain stability and move forward.

Comprehensive Jail Services

CTC works within the Eau Claire County Jail to provide case management services, offering programming and support that helps individuals transition back into the community. Our collaboration with the ECC Jail Re-entry team ensures continuity of care, making it easier for clients to connect with the services they need upon release.

A Preventative Approach

Family Interactions can be used reactively following an out-of-home placement, or proactively to support families before a child is placed. Through coaching, education, and structured support, we help families strengthen skills, improve safety, and reduce the need for out-of-home care.
